Supplemental Information

CDK5RAP2 Is Required to Maintain the Germ Cell Pool during Embryonic Development

Sami Zaqout, Paraskevi Bessa, Nadine Krämer, Gisela Stoltenburg-Diding, and Angela M. Kaindle

Supplementary figures

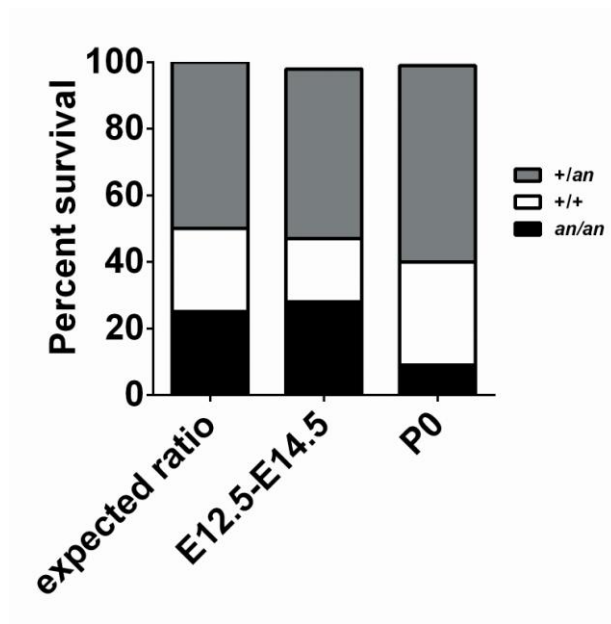

Figure S1. Partial embryonic lethality of *Cdk5rap2* mutant mice. Expected proportion of *an/an* mice were found at E12.5-E14.5, but only 9.5% of the offspring were *an/an* at P0, underlining partial embryonic lethality of mutant mice.

Figure S2. Genital phenotype in *Cdk5rap2* mutant females. Uterus (white arrow) in the *+/+* and ovaries are absent in *an/an* females.
