

## **Supplementary Information**

Oncogenic hijacking of a developmental transcription factor evokes vulnerability toward oxidative stress in Ewing sarcoma

Marchetto *et al.*

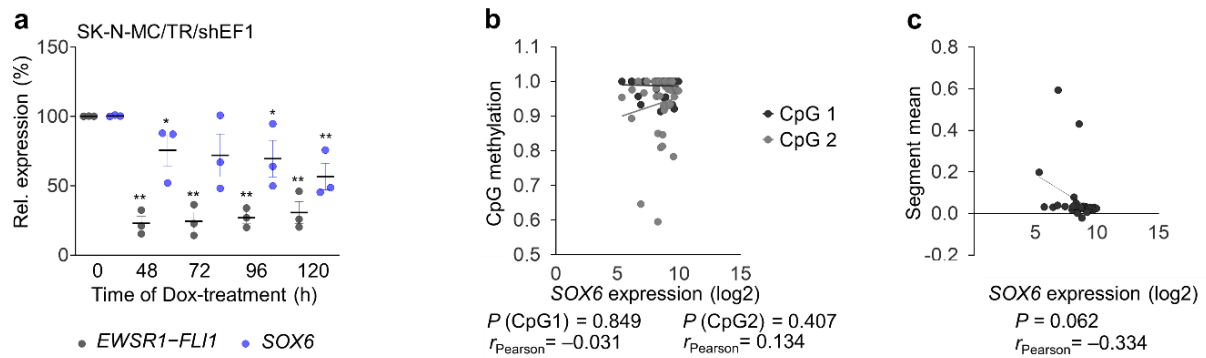

**Supplementary Figure 1** Marchetto *et al.*

**Supplementary Fig. 1 | Expression pattern of *SOX6* in pediatric cancer cell lines**

*SOX6* expression (qRT-PCR) of different EwS cell lines (*n* indicates the number of biologically independent experiments per cell line: TC-32 (*n*=8), RDES (*n*=8), POE (*n*=4), SK-PN-LI (*n*=4), STA-ET1 (*n*=4), TC-106 (*n*=4), EW22 (*n*=4), TC-71 (*n*=4), CHLA-32 (*n*=4), ORS (*n*=4, *P*=0.016), EW18 (*n*=3), SK-N-MC (*n*=4, *P*=0.008), COG-E-352 (*n*=4), EW17 (*n*=3, *P*=0.012), EW1 (*n*=4), MHH-ES1 (*n*=4), EW3 (*n*=4), CHLA-25 (*n*=4), SK-PN-DW (*n*=4), ES7 (*n*=4), EW16 (*n*=3), EW24 (*n*=3), CHLA-99 (*n*=4), CHLA-10 (*n*=4), CHLA-57 (*n*=4), A673 (*n*=4, *P*=0.004), EW7 (*n*=4, *P*=0.004)), rhabdomyosarcoma cell lines (*n* indicates the number of biologically independent experiments per cell line: Rh4 (*n*=3), Rh36 (*n*=3)), neuroblastoma cell lines (*n* indicates the number of biologically independent experiments per cell line: TGW (*n*=3), SK-N-AS (*n*=3)), and osteosarcoma cell lines (*n* indicates the number of biologically independent experiments per cell line: SAOS-2 (*n*=3), U2OS (*n*=3)). Expression levels were normalized to that of TC-32. Cell lines highlighted in blue color indicate EwS cell lines with highest *SOX6* expression that were used for the majority of experiments. Cell lines indicated in orange and green color represent EwS cell lines with intermediate or low *SOX6* expression, respectively. Horizontal bars represent means and whiskers SEM. *P* values determined via two-sided Mann-Whitney test by comparing TC-32 with the indicated cell line. \*\**P*<0.01, \**P*<0.05. Source data are provided as a Source Data file.

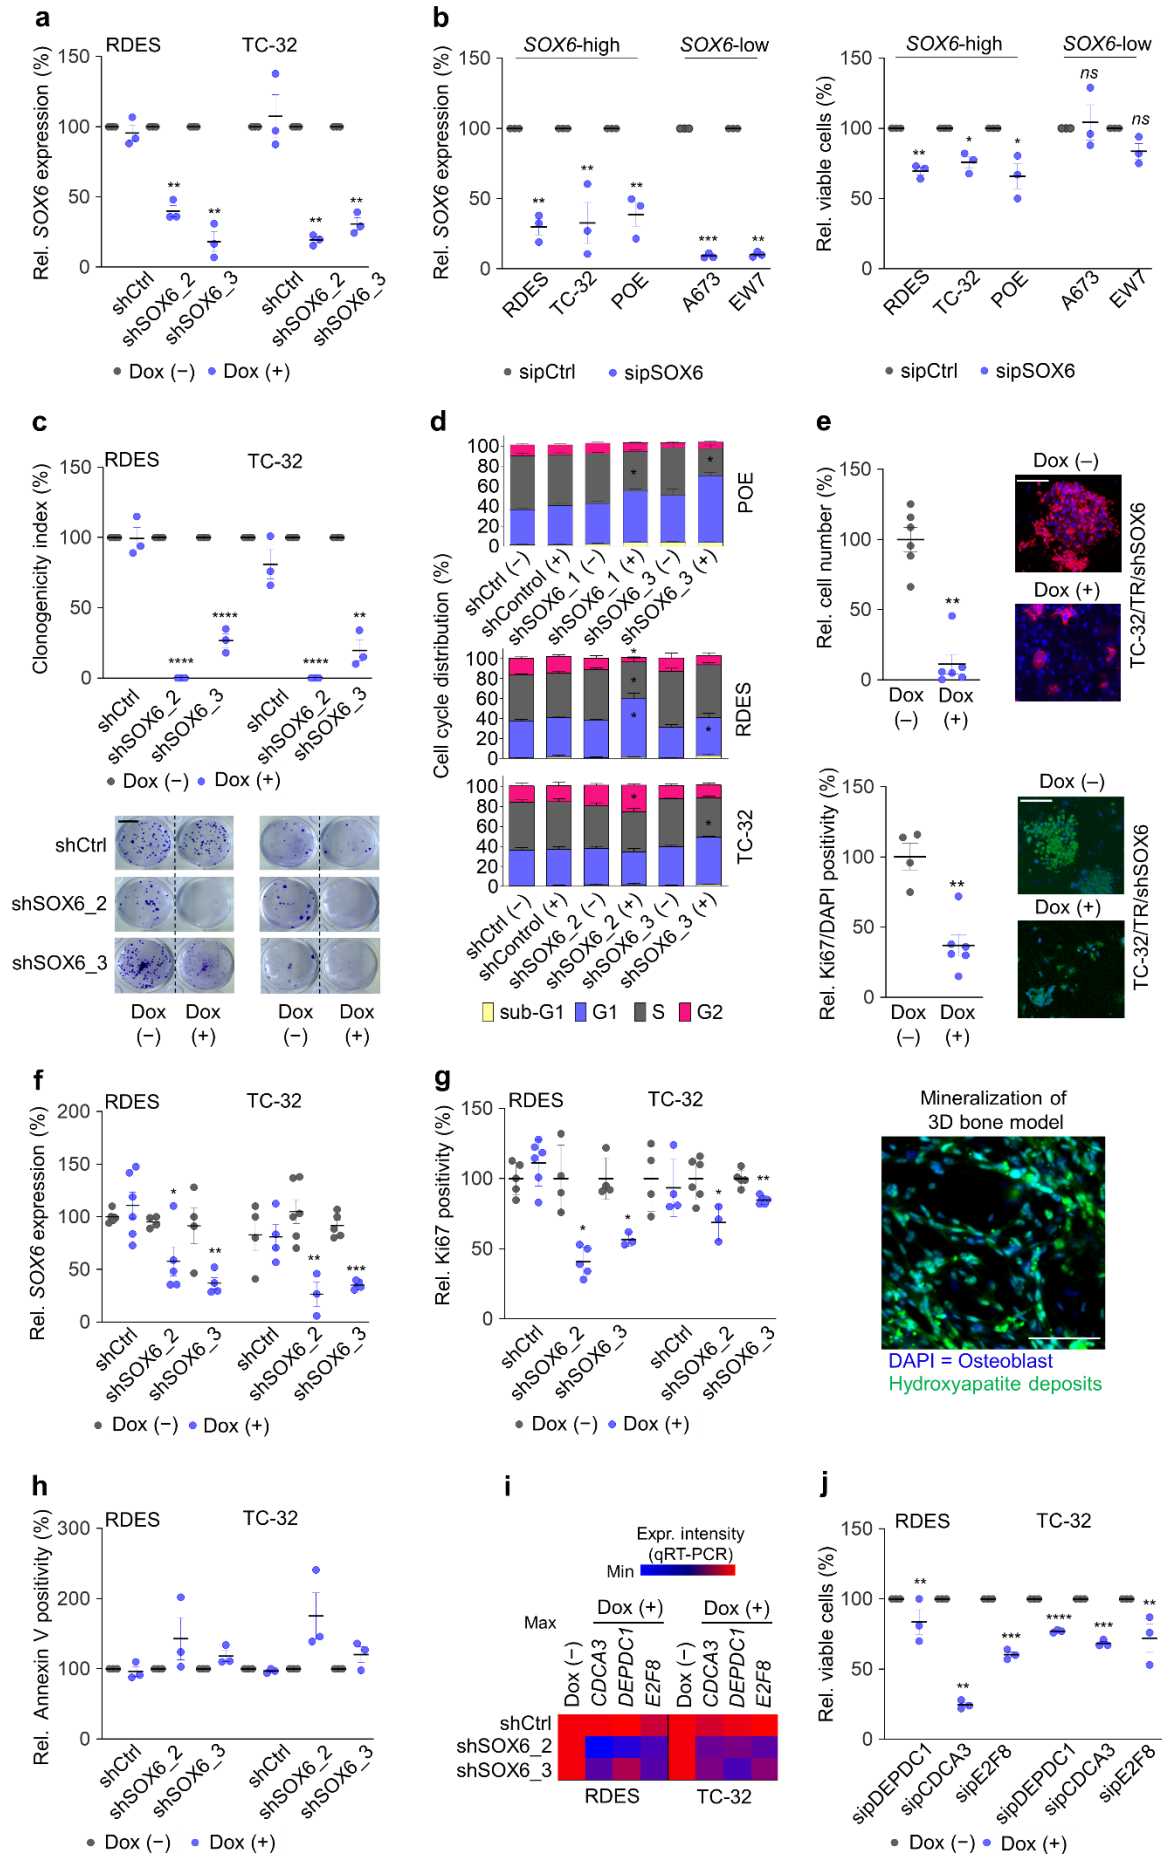

**Supplementary Figure 2** Marchetto *et al.*

**Supplementary Fig. 2 | *SOX6* is regulated by *EWSR1-FLI1* in EwS but neither by differential promoter methylation nor copy number variations**

a) *EWSR1-FLI1* and *SOX6* expression (qRT-PCR) in SK-N-MC/TR/shEF1 cells. Horizontal bars represent means and whiskers SEM,  $n=3$  biologically independent experiments.  $P$  values determined via two-sided Mann-Whitney test by comparing the time point 0h with the indicated time points (*EWSR1-FLI1*: 48-120h  $P=0.002$ ; *SOX6*: 48h  $P=0.015$ , 96h  $P=0.041$ , 120h  $P=0.002$ ). \*\* $P < 0.01$ , \* $P < 0.05$ . b) Correlation of methylation levels of two CpG-methylation sites within the *SOX6* promoter (CpG1/2) and *SOX6* expression levels (log2) in  $n=40$  biologically independent primary EwS tumors. Lines indicate linear regressions of the data.  $P$  values determined via two-sided Pearson correlation test. c) Correlation of copy number variation (segment mean) at the *SOX6* locus with *SOX6* expression levels (log2) in  $n=32$  biologically independent primary EwS tumors. The line indicates the linear regressions of the data.  $P$  values determined via two-sided Pearson correlation test. Source data are provided as a Source Data file.

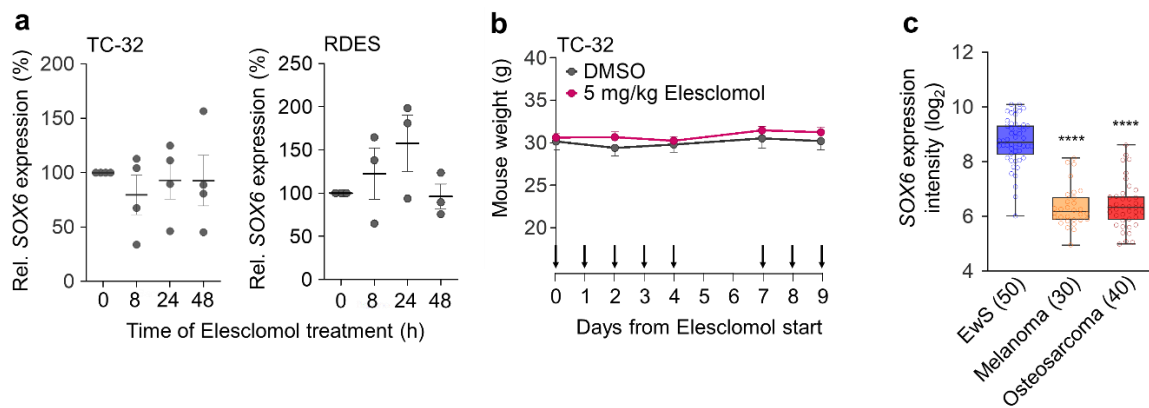

**Supplementary Figure 3** Marchetto *et al.*

### Supplementary Fig. 3 | *SOX6* promotes proliferation and growth of EwS cells

a) Relative *SOX6* expression (qRT-PCR) 96h after *SOX6* knockdown (sh*SOX6*). Horizontal bars represent means,  $n=3$  biologically independent experiments.  $P$  values determined via two-sided Mann-Whitney test (all  $P=0.002$ ). b) Left: Relative *SOX6* expression in A673 ( $P=0.0002$ ), EW7 ( $P=0.002$ ), POE ( $P=0.002$ ), RDES ( $P=0.002$ ) and TC-32 ( $P=0.022$ ) cells 96h after transfection with sipool-mediated *SOX6* knockdown. Horizontal bars represent means,  $n=3$  biologically independent experiments.  $P$  values determined via two-sided Mann-Whitney test. Right: Viable cell count of the same cells. Horizontal bars represent means,  $n=3$  biologically independent experiments, RDES ( $P=0.007$ ), TC-32 ( $P=0.025$ ), POE ( $P=0.047$ ).  $P$  values determined via two-sided independent one-sample  $t$ -test. c) Upper: Clonogenicity index during 12d of *SOX6* knockdown. Horizontal bars represent means,  $n=3$  biologically independent experiments, RDES: sh*SOX6*\_2 and sh*SOX6*\_3 (both  $P\leq 0.0001$ ), TC-32: sh*SOX6*\_2 ( $P\leq 0.0001$ ) and sh*SOX6*\_3 ( $P=0.009$ ).  $P$  values determined via two-sided Mann-Whitney test. Lower: Representative micrographs; scale bar=1cm. d) Cell cycle phases after *SOX6* knockdown. Horizontal bars represent means ( $n$  indicates biologically independent experiments per group, RDES: shCtrl/sh*SOX6*\_2 ( $n=4$ ), sh*SOX6*\_3 ( $n=3$ ); TC-32: shCtrl/sh*SOX6*\_2 ( $n=4$ ), sh*SOX6*\_3 ( $n=3$ ); POE: ( $n=4$ ). POE: S-phase sh*SOX6*\_1 ( $P=0.050$ ), sh*SOX6*\_3 ( $P=0.029$ ); RDES: G1 sh*SOX6*\_2 ( $P=0.0284$ ), sh*SOX6*\_3 ( $P=0.0477$ ), S-phase ( $P=0.029$ ), G2 ( $P=0.027$ ); TC-32: S-phase ( $P=0.050$ ), G2 ( $P=0.027$ )).  $P$  values determined via two-sided Mann-Whitney test. e) Top: Relative number of TC-32/TR/sh*SOX6* cells. Horizontal bars represent means,  $n=6$  biologically independent experiments,  $P=0.002$ . Representative micrographs of TC-32/TR/sh*SOX6* EwS cells (red) and osteoblasts (blue); scale bar=50 $\mu$ m.  $P$  values determined via two-sided Mann-Whitney test. Middle: Relative proliferation (Ki67/DAPI positivity) of TC-32/TR/sh*SOX6* cells in a 3D mineralized bone model. Horizontal bars represent means ( $n$  indicates biologically independent experiments per group, Dox(-)  $n=4$ , Dox(+)  $n=6$ ,  $P=0.010$ ). Representative micrographs of Ki67 staining of EwS cells (green) and osteoblasts (blue); scale bar=50 $\mu$ m. Bottom: Representative micrographs of mineralized bone matrix (blue=DAPI, green=hydroxyapatite); scale bar=100 $\mu$ M. f) *SOX6* expression (qRT-PCR) in RDES and TC-32 xenografts. Horizontal bars represent means ( $n$  indicates biologically independent xenografts, RDES: shCtrl (Dox(-)  $n=5$ , Dox(+)  $n=6$ ), sh*SOX6*\_2 (Dox(-)  $n=4$ , Dox(+)  $n=5$ ,  $P=0.027$ ), sh*SOX6*\_3 ( $n=4$ ,  $P=0.002$ ); TC-32: shCtrl  $n=4$ , sh*SOX6*\_2 (Dox(-)  $n=6$ , Dox(+)  $n=3$ ,  $P=0.001$ ), sh*SOX6*\_3 ( $n=5$ ,  $P\leq 0.0001$ ).  $P$  values determined via two-sided Mann-Whitney test. g) Ki67 positivity of RDES and TC-32 xenografts. Horizontal bars represent means ( $n$  indicates biologically independent xenografts, RDES: shCtrl (Dox(-)  $n=5$ , Dox(+)  $n=6$ ), sh*SOX6*\_2 (Dox(-)  $n=4$ , Dox(+)  $n=5$ ,  $P=0.016$ ), sh*SOX6*\_3 (Dox(-)  $n=4$ , Dox(+)  $n=3$ ,  $P=0.050$ ); TC-32: shCtrl  $n=4$ , sh*SOX6*\_2 (Dox(-)  $n=6$ , Dox(+)  $n=3$ ,  $P=0.038$ ), sh*SOX6*\_3 ( $n=5$ ,  $P=0.008$ )).  $P$  values determined via two-sided Mann-Whitney test. h) Relative Annexin V positivity 96h after *SOX6* silencing. Horizontal bars represent means,  $n=3$  biologically independent experiments. i) Relative *CDCA3*, *DEPDC1* and *E2F8* expression 96h after *SOX6* knockdown; averaged data of  $n=3$  biologically independent experiments. j) Proliferation of EwS cells 96h after sipool-mediated knockdown of *CDCA3* (TC-32  $P=0.0002$ , RDES  $P=0.002$ ), *DEPDC1* (TC-32  $P\leq 0.0001$ , RDES  $P=0.006$ ) or *E2F8* (TC-32  $P=0.010$ , RDES  $P=0.0006$ ). Horizontal bars represent means,  $n=3$  biologically independent experiments.  $P$  values determined via two-sided independent one-sample  $t$ -test. All error bars represent SEM. \*\*\*\* $P\leq 0.0001$ , \*\*\* $P<0.001$ , \*\* $P<0.01$ , \* $P<0.05$ . Source data are provided as a Source Data file.

**Supplementary Figure 4 Marchetto *et al.***

**Supplementary Fig. 4 | Elesclomol has no effect on *SOX6* expression and mouse weight in *SOX6*-high EwS cells**

a) Relative *SOX6* expression levels in RDES and TC-32 cells during Elesclomol-treatment (10 nM). Horizontal bars represent means and whiskers SEM, TC-32:  $n=4$  biologically independent experiments, RDES:  $n=3$  biologically independent experiments. b) Body weight of mice during intravenous Elesclomol-treatment (5 mg/kg). Dots represent means and whiskers SEM,  $n=5$  biologically independent animals per condition. c) *SOX6* expression intensities (log<sub>2</sub>) of primary EwS tumors, melanomas ( $P \leq 0.0001$ ) and osteosarcomas ( $P \leq 0.0001$ ) as determined by Affymetrix microarrays<sup>20</sup>. The number of biologically independent samples ( $n$ ) is given in parentheses. Horizontal bars indicate medians and boxes the interquartile range. Whiskers indicate the 10<sup>th</sup> and 90<sup>th</sup> percentile.  $P$  values determined via two-sided Mann-Whitney test. \*\*\*\* $P \leq 0.0001$ . Source data are provided as a Source Data file.

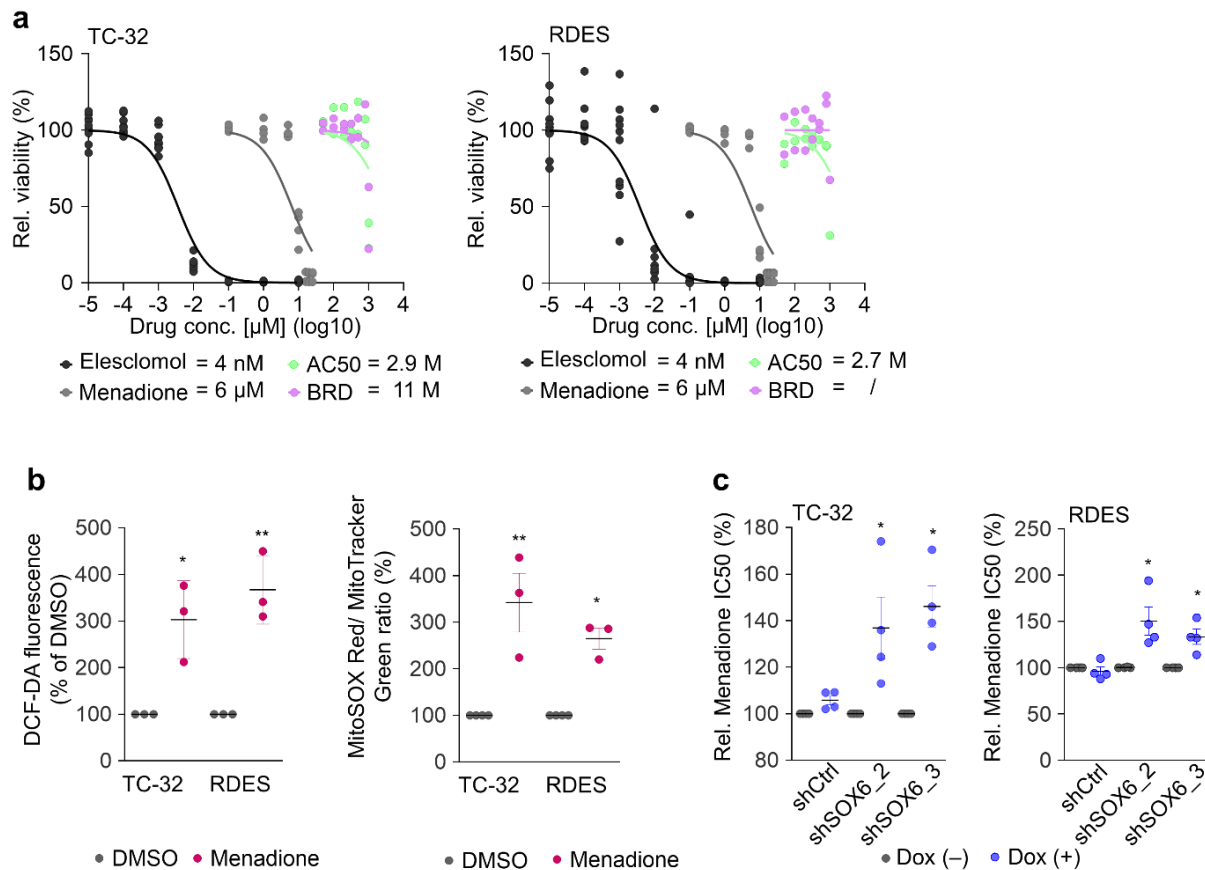

**Supplementary Figure 5** Marchetto *et al.*

**Supplementary Fig. 5 | *SOX6* overexpression induces *TXNIP* and Elesclomol sensitivity**

a) Cell viability of EwS cells treated with vehicle (H<sub>2</sub>O) or H<sub>2</sub>O<sub>2</sub> (30  $\mu$ M). Horizontal bars represent means ( $n$  indicates the number of biologically independent experiments, TC-32: shSOX6\_2  $n=6$ , shSOX6\_3  $n=5$ ; RDES: shSOX6\_2  $n=6$ , shSOX6\_3  $n=5$ ). b) Expression fold change (log<sub>2</sub>, qRT-PCR) of *SOX6* ( $P=0.0002$ ) and *TXNIP* ( $P=0.0002$ ) after 96h of *SOX6* overexpression in A673/TR/cSOX6 cells. Horizontal bars represent means,  $n=4$  biologically independent experiments.  $P$  values determined via two-sided Mann-Whitney test. c) Relative Elesclomol IC<sub>50</sub> in A673/TR/cSOX6 cells after 72h of concomitant Elesclomol and Dox-treatment. Horizontal bars represent means,  $n=7$  biologically independent experiments,  $P=0.008$ .  $P$  values determined via two-sided Mann-Whitney test. All error bars represent SEM. \*\*\* $P<0.001$ , \*\* $P<0.01$ . Source data are provided as a Source Data file.

## Supplementary Figure 6 Marchetto *et al.*

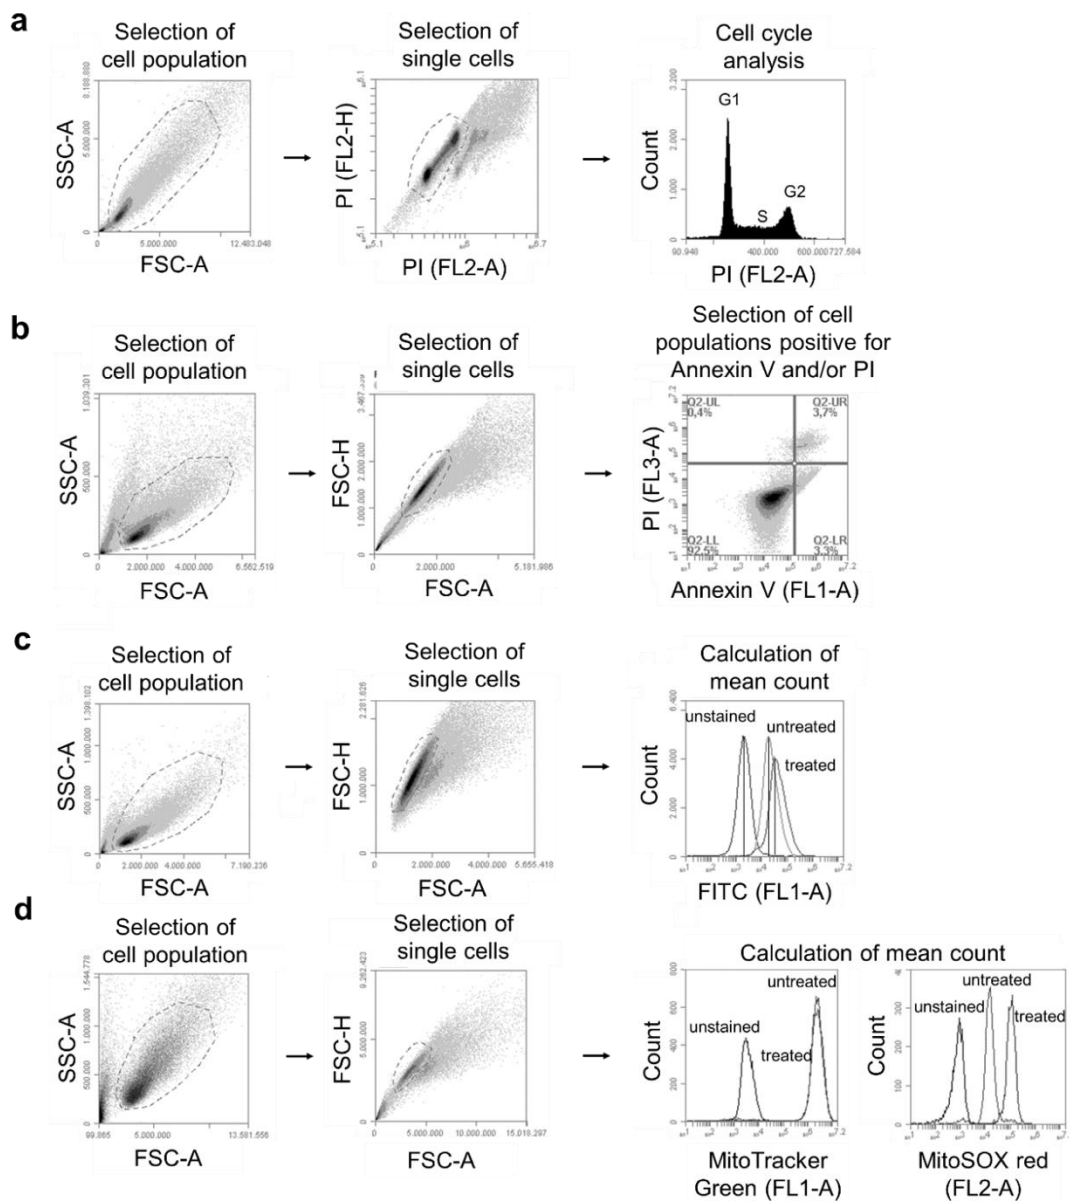

### Supplementary Fig. 6 | Elesclomol is a potent inducer of oxidative stress in EwS

a) Relative viability of TC-32 and RDES cells after treatment with three different oxidative stress inducers (Menadione: TC-32  $n=4$ , RDES  $n=4$ ; DC\_AC50 (AC50): TC-32  $n=2$ , RDES  $n=2$ ; BRD56491 (BRD): TC-32  $n=2$ , RDES  $n=2$ ) for 72h compared to Elesclomol (TC-32  $n=9$ , RDES  $n=10$ ),  $n$  indicates the number of biologically independent experiments per drug. Modeled dose-response curves and calculated IC<sub>50</sub> values are displayed. b) Relative DCF-DA fluorescence (left) and MitoSOX Red/MitoTracker Green ratio (right) in TC-32 and RDES cells after treatment with Menadione (10  $\mu$ M) compared to DMSO (control). Horizontal bars indicate means,  $n=3$  biologically independent experiments.  $P$  values determined via two-sided independent one sample  $t$ -test (TC-32: DCF-DA  $P=0.047$ , MitoSOX Red  $P=0.014$ ; RDES: DCF-DA  $P=0.004$ , MitoSOX Red  $P=0.004$ ). c) Relative Menadione IC<sub>50</sub> values in indicated cell lines 72h after start of concomitant Menadione- and Dox-treatment. Horizontal bars represent means,  $n=4$  biologically independent experiments.  $P$  values determined via two-sided Mann-Whitney test (all  $P=0.029$ ). All error bars represent SEM. \*\* $P<0.01$ , \* $P<0.05$ . Source data are provided as a Source Data file.

## Supplementary Figure 7 Marchetto *et al.*

### Supplementary Fig. 7 | Examples of flow-cytometric gating strategies

a) Gating strategy for flow-cytometric cell-cycle analysis of EwS cells using PI. b) Gating strategy for Annexin V/PI staining of EwS cells. c) Gating strategy for flow-cytometric measurement of DCF-DA fluorescence in EwS cells. d) Gating strategy for flow-cytometric measurement of MitoSOX Red and MitoTracker Green fluorescence in EwS cells.

**Supplementary Table 1 | Characteristics of the intronic *SOX6*-associated GGAA-mSat**

Summary of the number of consecutive GGAA-repeats and corresponding relative enhancer activity of the *SOX6*-associated GGAA-mSat in eight cell lines with different *SOX6* expression levels (TC-32 was set as reference).

|           |                                             | GGAA-repeats |          |                                | Enhancer activity |          |                           |                                           |
|-----------|---------------------------------------------|--------------|----------|--------------------------------|-------------------|----------|---------------------------|-------------------------------------------|
