Supplementary Figure S1: Curcumin reduced viability of SW620 cells after 48 h. CRC cells were treated with various concentrations of curcumin. Cell viability has been further determined using the MTT assay. Viability of the CRC cells was reduced upon 48 h curcumin treatment in a dose-dependent manner. Data represent mean \pm SEM ($n \geq 3$), $*=p < 0.05$, $**=p < 0.01$ $***=p < 0.001$
