

Intra Reader Comparison T2 - Correlation and Bland Altman Blots

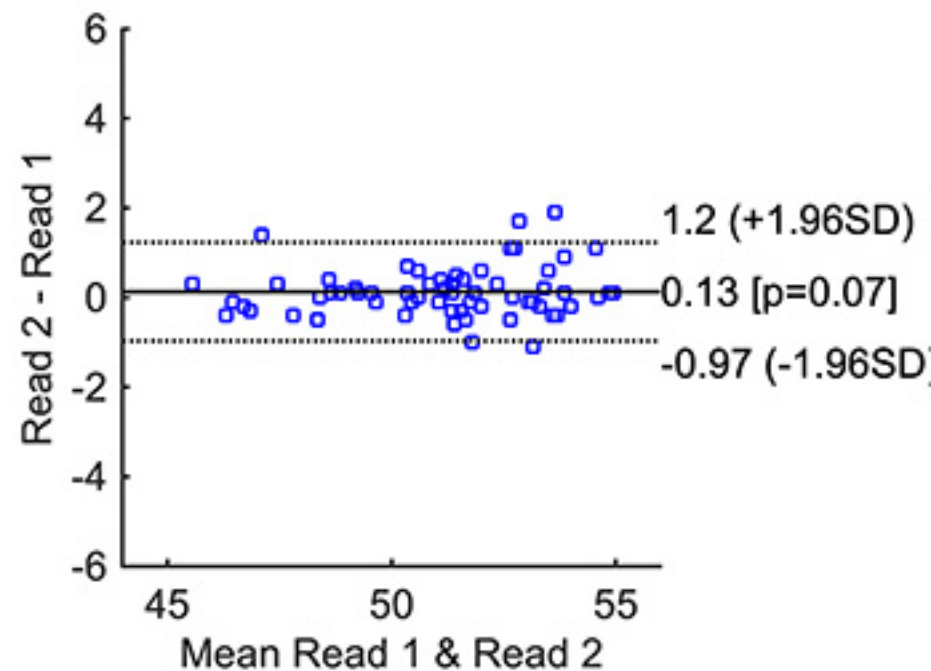

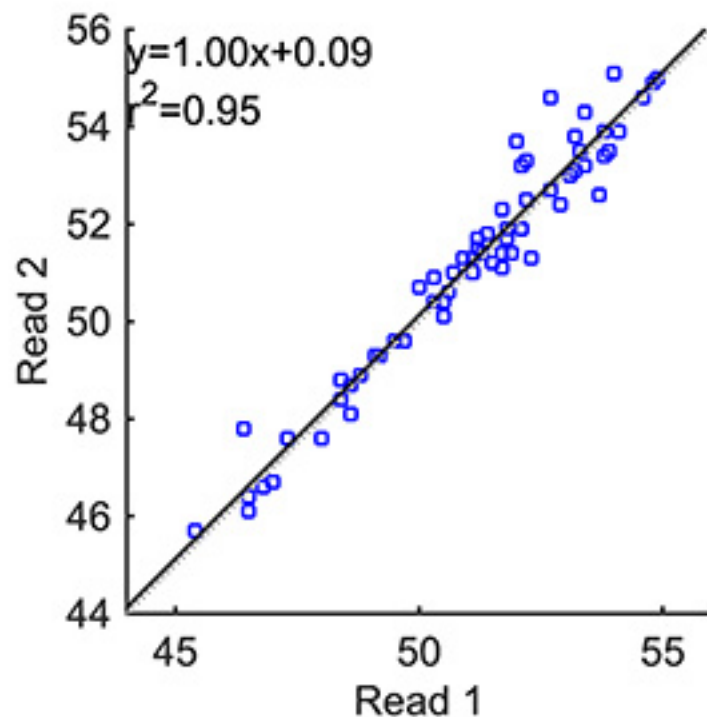

Figure S1: Shown are the Correlation (left) and Bland-Altman analysis (right) for the results of the T2-bSSFP 3RR healthy volunteer measurements, conducted by the same reader.

Inter Reader Comparison T2

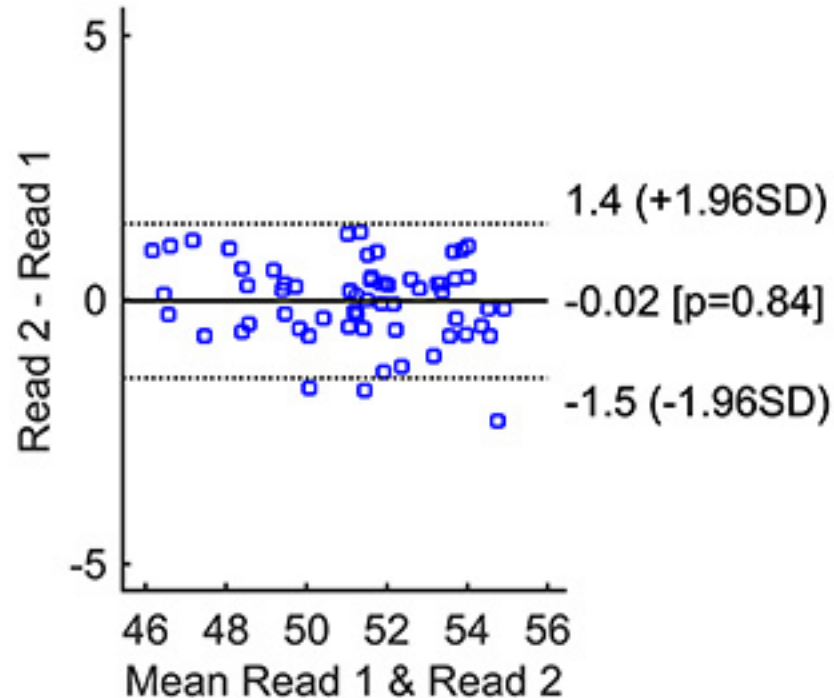

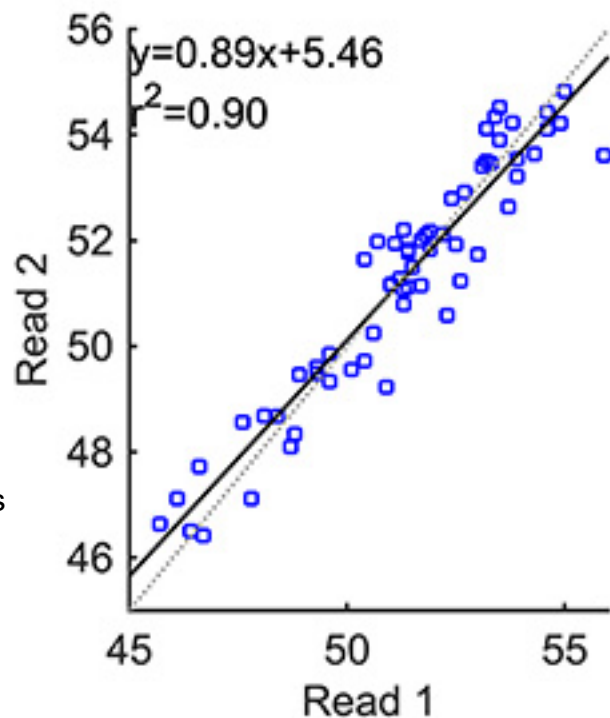

Figure S2: Shown are the Correlation (left) and Bland-Altman analysis (right) for the results of the T2-bSSFP 3RR healthy volunteer measurements, conducted by two readers.

Intra Reader Comparison T2 - Phantom Experiment

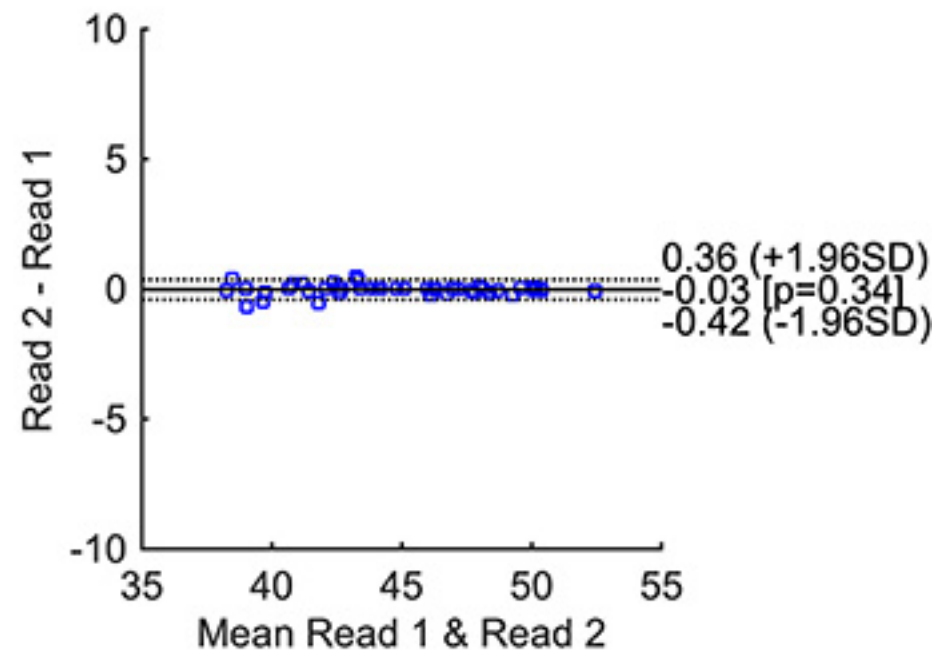

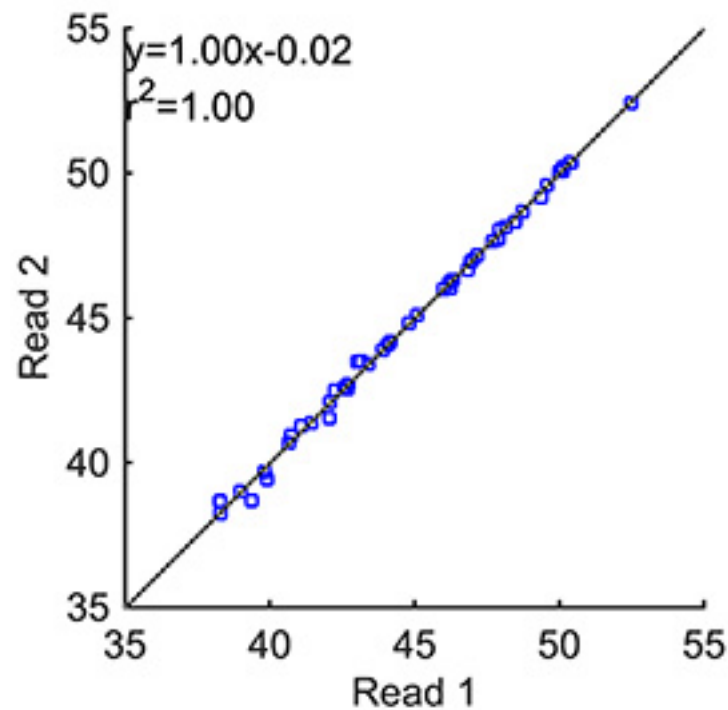

Figure S3: Shown are the Correlation (left) and Bland-Altman analysis (right) for the results of the T2-bSSFP 3RR phantom measurements, conducted by the same reader. The analyses include both measurements for tubes D, E and F at heart rates ranging from 60–130 bpm.
