

Border-zone cardiomyocytes and macrophages regulate extracellular matrix remodeling to promote cardiomyocyte protrusion during cardiac regeneration

Corresponding Author: Dr Arica Beisaw

This manuscript has been previously reviewed at another journal. This document only contains information relating to versions considered at Nature Communications.

This file contains all reviewer reports in order by version, followed by all author rebuttals in order by version.

Version 1:

Reviewer comments:

Reviewer #1

(Remarks to the Author)

All of my comments from the previous submission have been adequately addressed by the authors.

Reviewer #3

(Remarks to the Author)

The authors have addressed all my previous concerns and significantly improved the manuscript. I have no further comments.
