

Supplementary Fig. 1. Kaplan-Meier survival curves of top candidate genes.

Kaplan-Meier curves displaying the association of mRNA expression of *CREBBP*(**A**), *HDAC7*(**B**), *MSL1* (**C**), *NCOA2* (**D**) and overall survival in the Mulligan MM patient dataset. Log-rank (Mantel-Cox) test was used to calculate *P* values and hazard ratios (HR).
